UMBT Board of Supervisors

RE: Request membership to reinstated Environmental Advisory Board

I would like to be considered as a member of the reinstated Environmental Advisory Board. As you are aware the board was discontinued during a previous Board with no reason given. I have attached the summary of an EAC, all of which would be helpful reconnecting residents with the governing board and committees. The EC is a diverse group of individuals that can research and educate on various topics. In the past UMBT EAC was instrumental in gaining grants, forming protocol, and establishing policy with the help of outside organizations and agencies.

I would like to help get the UMBT EAC reorganized with the history of being a founding member. An EAC could bring residents together to articulate visions for the future of our community. Basically, bring the community together on various issue discussions from low key outdoor education to more involved preliminary planning ideas for the Board to entertain.

My background is in environmental education and wildlife research. I have been a member of several boards and committees locally and at the county level over the last two decades. I am currently a member of Martins-Jacoby Watershed Association. I still attend several other organization meetings as "the public" to keep abreast of current issues for a better perspective on sustainable improvement of our Township culture and identity.

Thank you for your consideration.  
Judy
